

## Indicating Gauges

*Note: This refers to gauges whose purpose is to show if pressure is present in a supply system and, if so, the approximate magnitude of the pressure. They are neither depth gauges nor life support gauges (as in detail sheets 18 and 19)*

### When new

Examination/Test	Category of Competent Person
In accordance with manufacturer's specification and fit for the purpose it will be used for	3 or 4

### When in service

Examination/Test	Validity Period	Category of Competent Person
Visual examination for physical condition and function test throughout normal operating range	6 months	1, 2, 3 or 4

#### Reference:

- ♦ AODC 059 – Pressure gauges and other forms of pressure monitoring equipment used in conjunction with diving operations

#### Note:

- ♦ These types of gauges will not normally require any certification. Instead it will be acceptable to record the checks and the results in the planned maintenance system.
- ♦ Gauges which are inaccessible (such as inside the diving bell) may be checked by a diver under the supervision of a competent person.
